SEALERS

* * CLEAR VINYL SEALER **VINSEAL** – 28% solids provides outstanding resistance to moisture and has better alcohol resistance than conventional sealers. The gloss finish will not flatten with aging and its use avoids peeling of the finish.

* * SANDING SEALER, **LACSEAL** – 18% solids nitrocellulose, has been designed for production applications and is both cost effective and VOC compliant. The moderate solid content allows for good film build at a lower cost than most conventional lacquers.

PRIMERS (UNDERCOATS)

* * PRE-CATALYZED WHITE LACQUER PRIMER **PRECATWHUN** is a premium grade universal undercoat for use under regular, pre-catalyzed lacquer or conversion varnish. 42% solids

TOPCOATS (PRECATALYZED)

* * CLEAR PRE-CATALYZED LACQUER, available in nitrocellulose based, formulated in a VOC compliant, high build, self sealing formula that has superior resistance to water, solvent and household chemicals. 27% solids, ready to spray.)

| | | |
|----------|------------------|--------------|
| 60 sheen | PRECAT60_ | (Semi-gloss) |
| 40 sheen | PRECAT40_ | (Satin) |
| 20 sheen | PRECAT20_ | (Dull) |

* * WHITE PRE-CATALYZED LACQUER is a pre-catalyzed nitrocellulose lacquer formulated in a VOC compliant, high build, self sealing formula that has superior resistance to water, solvent and household chemicals. 38% solids, ready to spray.

| 85 sheen, white, gloss | PRECATWH85_ |

UN-CATALYZED TOPCOATS

Nitrocellulose based, amber color, 18% solids, ready to spray. You will not find a more cost effective lacquer on the market

| | |
|----------------------|---------------|
| 40 sheen, satin | LAC405 |
| 60 sheen, semi-Gloss | LAC605 |

NITROCELLULOSE PRECATALYZED BLACK LACQUER

60 sheen, black, semi- gloss **LACBL601**

FILL STICKS. When the job is all finished and delivered, to make a quick fix in the field, use DAP Blend Sticks or Behlen Fill Sticks to fill any gouges or deep scratches that occur during transit. Simply warm stick in your pocket or hand, pinch off a smidgen, then smear into the gouge with your thumb. Recoat with lacquer of appropriate sheen as needed.

RETARDER. Inferior lacquers may require retarder as a regular addition prior to spraying. When needed, add 6 oz. of retarder per gallon. Not for use with water based products. 1's only

FISHEYEKILL is an additive for the elimination of surface defects.

May be used with all Sampson lacquer products and should be used only when absolutely necessary. Typical usage: 1-2 fluid oz. per gallon.

Sold by the gallon.

LACTHIN5 is a medium-priced thinner, suitable for lacquers when spraying in normal conditions (neither exceptionally hot, cold nor humid) and because of its competitive price, it is also suitable for cleaning all nitrocellulose lacquers, certain contact cements, and wood surfaces after strippers.

SCRATCH REMOVER - Behlen's scratch remover markers permanently stain wood - can be used to refinish worn out spots and scratches on furniture, as well as leather and vinyl. Dries instantly. Gloss may be adjusted by spraying over with aerosol lacquers. (See our website for color chart, or request a copy to be mailed to you.)

SUNDRIES

KNIT25 rags are especially chosen for wood finisher needs. These rags have a high cotton content (will not wilt when exposed to petroleum based solvents), are off white in color, and are so clean we can almost claim they are lint free. 25-lb. boxes.

RAGS200 are a Scott Paper product, made from paper, but feels surprising like cloth. Lint free - suitable for stain application. 200 tear off rag/towels in a self-dispensing box. Sold by the box.

PLASTICGLOVE is a throw-away, x-large non-handed glove that protects hands from all the staining and finishing colors. Boxes of 300.

Filtering of all finishing products is a good idea.
 Clear – use **CLEARFILTER** (150 micron) packed 250/sleeve.
 Pigments – use **PIGMENTFILTER** (190 micron) packed 100/sleeve
