

SAFETY EQUIPMENT

HALF FACE MASK PIECE RESPIRATOR

LGRESP MEDRESP

This product, provided by Gerson, is a replacement for the 3M item - 6000 and 6100. These masks have trapezoidal shaped filters (not round) with slightly rounded corners. The masks, as provided, require the following additional items, ordered separately.. Depending on needs, order **VAPORCART** (the cartridge filters are used with finishing products, for organic vapors and mists), **PREFILTERS** (cotton filters to keep the more expensive VAPORCART from clogging from lacquer solids), and **PRERETAINERS** (the plastic holders that retain the PREFILTERS against the VAPORCART) (3M filters and related paraphernalia do not interchange with Gerson masks.

Costing only slightly more than refitting replaceable mask parts, these masks are shipped complete and ready to use with no replaceable parts. Each person has their own mask in a re-sealable plastic bag and replaces the whole thing when the old one gets to be disgusting looking or vapor smell penetrates when in use.

LARGEMASK MEDIUMMASK

Available in two sizes, and sold individually or by the case of 12.

DUSTMASKS (20/box)

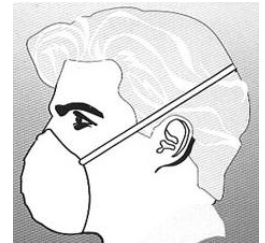

Manufactured by Mercer Abrasives and are NIOSH approved. Filter efficiency level is 95%, effective against particulate aerosols free of oil.
